Quinnox
BI OBIEE Solution

For more information, visit

http://www.quinnox.com

Every reputable organization today fully understands the value of analysis and insight. Business Intelligence is aimed at organizations to improve business outcomes with informed decisions. That's made possible by capturing, analyzing, and presenting timely and valuable information in the fastest, best way. In doing so, companies can use that intelligence to elevate performance, reduce TOC, and realize many other essential and business-driving benefits.

Solution Overview

Quinnox offers end-to-end BI and DW services using Oracle Business Intelligence Enterprise Edition (OBIEE) technology – Reporting and Analytics, Maintenance and Support. Our services enable clients to arrive at a BI roadmap and strategy. This can include Data Warehousing Implementation, Data Mining, Data Quality and Master Data Management (MDM) services. We have developed in-house tools and best practices to assess technology platforms, support desk performance and MDM. Our team consists of more than 500 people with a deep understanding and strong expertise in the testing services and integration domain.

Benefits

The Quinnox BI OBIEE solution provides the analytics and insight needed to gain some substantial benefits to organizations:

Drives innovation

Deploy best practices

Reduce costs

Boost productivity
