

Quinnox successfully executes multiple webMethods migrations to the latest version with zero business impact for a **B2B and retail office products distributor**

There was a lack of support for the EAI production environment during business and off-hours (24x7) on different versions of webMethods.

Quinnox successfully executed multiple webMethods migrations to the latest version with zero business impact. We helped our customer realize cost savings of \$1.5M over two years for application and infrastructure maintenance. Quinnox also helped reduce new customer on-boarding time by 54% and ensured successful 30 days of on-boarding from 17% to 83% in one year
